

I believe K-LOVE serves a very unique and valuable service to my community, and many communities and residents across the United States. Through a series of LPFM translators, we have a choice of broadcast radio while traveling beyond our local city. With the national exposure of K-LOVE's non-profit broadcasting, one can follow from frequency to frequency while traveling. This would not be possible if these frequencies were taken and replaced with strictly LPFM broadcasters. I believe this unique feature provides a very important and valuable public service.

Hundreds of thousands of people listen to K-LOVE on these FM translators. I do not favor giving new LPFM priority over FM translator services. That could affect me! In our area we happen to have a local LPFM station that does a fine job, however, travel more than 4 miles outside of the main transmittal antenna, and you lose the signal. Please keep K-LOVE on the air with the ability to secure unused FM translators when a community asks them to expand into their local broadcast area. THANK YOU.
